Professional Summary

DevOps and software engineer experienced in cloud infrastructure, CI/CD, GitOps, observable Kubernetes workloads, and production-facing web services. Delivered a six-month engineering project at DevWise across four product contexts and a centralized operations platform. Comfortable working from infrastructure as code and runtime operations through backend APIs and modern web applications.

Technical Skills

DevOps & Cloud	GitLab CI/CD, GitHub Actions, Docker, Kubernetes, K3s, Argo CD, Terraform, Ansible, Helm, Kustomize, OVHcloud, GCP, AWS, Linux, Nginx, Traefik
Observability & Security	Prometheus, Grafana, Loki, Tempo, OpenTelemetry, Alertmanager, Vault, Keycloak, Gitleaks, SonarQube, Snort, SIEM, IAM
Software Engineering	Python, Java, Go, TypeScript, Bash, FastAPI, Spring Boot, Node.js, Next.js, React, Angular, REST APIs, microservices
Data & Messaging	PostgreSQL, Redis, RabbitMQ, Qdrant, MinIO, Kafka, SQL, Superset, NiFi

Professional Experience

Omnixis AI — Software and AI Engineering Intern <i>Remote</i>	Aug 2026 – Present
- Deliver FastAPI and Next.js production features for an AI voice platform: knowledge ingestion, tenant analytics, guarded calls, AI avatars, provider failover, queues, and usage controls. - Improved staging and production delivery with self-hosted runners, Docker checks, and automated safeguards.	
DevWise — DevOps and Software Engineering Intern — Final-Year Project <i>Nabeul, Tunisia</i>	Feb 2026 – Aug 2026
- Defined a reusable DevSecOps/GitOps model and adapted it to DevWise, Helpify, Planify, and Speedline. - Developed DevWiseOps, a microservices control plane for GitLab delivery, K3s runtime discovery, security, audit evidence, observability, operational BI, and evidence-grounded RAG. - Integrated GitLab CI/CD, Terraform, K3s, Argo CD, Vault, Keycloak, Prometheus, Loki, Tempo, OpenTelemetry, and Qdrant across Java, Go, Python, and Angular services. - Validated targeted workflows with 509 Java tests, 181 Python tests plus 12 subtests, 36 Go tests, 18/18 Prometheus targets up, and a 1,383-request read-only load probe with 0 failures.	
Tunisie Telecom — Network, Cybersecurity and Monitoring Intern <i>Nabeul, Tunisia</i>	Jul 2025 – Aug 2025
Built segmented VLAN/DMZ and IPsec environments, hardened Cisco ASA policies, and centralized server, Snort IDS, and iptables logs for monitoring and alerting.	

Selected Engineering Projects

Speedline — GCP to OVHcloud Infrastructure	2026
Audited legacy GCP and designed the OVHcloud K3s/GitOps target with Terraform, Argo CD, Kustomize, and 23 components; implemented logical staging/production isolation, documented physical VPS separation, and recorded 24/24 production replicas ready in a targeted validation.	
Planify and Helpify — Product-Specific GitOps Delivery	2026
Provisioned K3s and Argo CD foundations, reusable Helm/Kustomize delivery, separate desired states, selective builds, staging deployment, and runtime verification through GitLab pipelines.	
ExamBuilder — Production Infrastructure and Observability	2026
Built layered K3s/GitOps delivery and a Prometheus, Grafana, Alertmanager, Blackbox, node-exporter, and kube-state-metrics stack with three versioned dashboards for infrastructure, Kubernetes, and k6 signals.	
MediCore AI — Medical Operations and Analytics Platform	2026
Containerized web, API, mobile, PostgreSQL, ML, NiFi, and Superset workloads; versioned 14 analytical views, 14 datasets, 39 charts, and three dashboards.	

Education

IT Business School — Engineering Degree, Networks and Security	2023 – 2026
ISSET Nabeul — Bachelor's Degree, Industrial Automation and Computing	2020 – 2023
Technical Baccalaureate	2020

Selected Certifications

Cisco Enterprise Networking, Security and Automation (2025) | IBM Cybersecurity Analyst (2025) | Linux Essentials, Cisco (2025) | AWS Academy Machine Learning Foundations (2024) | Python 3 Programming Specialization, University of Michigan (2024)
