

Nayer Fki

DevOps & Software Engineer

Nabeul, Tunisia | +216 90 697 485 | nayerfki5@gmail.com
Portfolio | LinkedIn | GitHub | GitLab

Professional Summary

DevOps and software engineer building automated delivery platforms, observable Kubernetes infrastructure, and production-facing web services. Experienced across infrastructure as code, GitOps, backend APIs, and modern web applications, with recent work at DevWise, Omnixis AI, and Cafee Agency.

Technical Skills

Platform Engineering	GitLab CI/CD, Docker, Kubernetes, K3s, Argo CD, Terraform, Ansible, Helm, Kustomize, GitOps
Cloud & Operations	OVHcloud, GCP, Linux, Nginx, Traefik, Prometheus, Grafana, Loki, Tempo, OpenTelemetry, Alertmanager
Software Engineering	Python, Java, Go, TypeScript, Bash, FastAPI, Spring Boot, Node.js, Next.js, React, Angular, REST APIs
Security & Data	Vault, Keycloak, Gitleaks, SonarQube, PostgreSQL, Redis, RabbitMQ, Qdrant

Professional Experience

Omnixis AI <i>Software and AI Engineering Intern</i>	Aug 2026 – Present <i>Remote</i>
- Deliver FastAPI and Next.js production features for an AI voice platform: knowledge ingestion, tenant analytics, guarded calls, AI avatars, provider failover, queues, and usage controls, reducing dependency on a single AI provider. - Improved staging and production delivery with self-hosted runners, Docker checks, and automated safeguards.	
DevWise <i>DevOps and Software Engineering Intern — Final-Year Project</i>	Feb 2026 – Aug 2026 <i>Nabeul, Tunisia</i>
- Defined a reusable DevSecOps/GitOps model and adapted it to DevWise, Helpify, Planify, and Speedline. - Developed DevWiseOps for GitLab delivery, K3s runtime discovery, security, audit evidence, observability, BI, and evidence-grounded RAG; integrated Terraform, Argo CD, Vault, Keycloak, Prometheus, Loki, Tempo, OpenTelemetry, and Qdrant.	
Cafee Agency <i>Freelance Software Integration Engineer</i>	Jan 2026 – May 2026 <i>Remote</i>
Extended the Sœurise marketplace with Stripe Connect payment splits and webhooks, plus Mondial Relay and Boxtal delivery, label, tracking, and signed-webhook workflows.	
Tunisie Telecom <i>Network, Cybersecurity and Monitoring Intern</i>	Jul 2025 – Aug 2025 <i>Nabeul, Tunisia</i>
Built segmented VLAN/DMZ and IPsec environments, hardened Cisco ASA policies, and centralized server, Snort IDS, and iptables logs for monitoring and alerting.	

Selected Engineering Projects

Speedline — GCP to OVHcloud Infrastructure	2026
Audited the legacy GCP estate and designed an OVHcloud K3s/GitOps target with Terraform, Argo CD, and Kustomize; implemented logical staging/production isolation and documented the physical VPS separation plan.	
MediCore AI — Medical Operations and Analytics Platform	2026
Containerized web, API, mobile, PostgreSQL, ML, NiFi, and Superset workloads; versioned 14 analytical views, 14 datasets, 39 charts, and three dashboards.	
ExamBuilder — Post-PFE Infrastructure and Observability	2026
Built layered K3s/GitOps delivery and a Prometheus, Grafana, Alertmanager, Blackbox, node-exporter, and kube-state-metrics stack with three versioned dashboards for infrastructure, Kubernetes, and k6 signals.	

Education

IT Business School — Engineering Degree, Networks and Security	2023 – 2026
ISSET Nabeul — Bachelor's Degree, Industrial Automation and Computing	2020 – 2023

Selected Certifications

Cisco Enterprise Networking, Security and Automation (2025) | IBM Cybersecurity Analyst (2025) | Linux Essentials, Cisco (2025) | AWS Academy Machine Learning Foundations (2024) | Python 3 Programming Specialization, University of Michigan (2024)
